The Override View Overview

The Override View · https://www.forecastpro.com/documentation/forecast-pro-trac/the-override-view/the-override-view-overview/

> Marked content is Forecast Pro TRAC only

The override view is used for several different purposes. It can be used

1. to enter overrides to the statistically generated forecasts (or specified baseline forecasts)
    - Working with Overrides
2. [TRAC] to display imported data and calculated rows
    - Override Row Types
    - Defining Calculated Rows
    - Formatting Override Rows
    - Defining Row Properties
3. [TRAC] to specify the baseline forecasts.
    - Specifying the Baseline Forecast
