# Updating a Project Overview

Updating a Project · https://www.forecastpro.com/documentation/forecast-pro-trac/updating-a-project/updating-a-project-overview/

For most organizations updating the forecast is a routine operation that occurs every planning period. For instance, if the forecasts are prepared using monthly data, then each month the data are updated to include the latest observation and the forecasts are regenerated.

Updating a Forecast Pro project to generate new forecasts using the latest data is a straightforward process—in this lesson we will explore how this is accomplished.
